<tbody>
<tr>
<td>Leading wideband accuracy</td>
<td>Basic 0.01%(PPA5500) with class leading high frequency performance</td>
</tr>
<tr>
<td>New Voltage Attenuator Design</td>
<td>3.3Mohm, Low burden and heat dissipation, Maintaining excellent frequency response and Linearity</td>
</tr>
<tr>
<td>Wide frequency range</td>
<td>DC, 10mHz to 2MHz</td>
</tr>
<tr>
<td>Fast sample rate and No-Gap</td>
<td>2.2M samples/s</td>
</tr>
<tr>
<td>Leading phase accuracy</td>
<td>0.005 Degrees plus 0.01 degrees per kHz  (0.003 Degrees - Transformer Edition)</td>
</tr>
<tr>
<td>Built in high precision current shunt</td>
<td>10Arms, 30Arms or 50Arms with up to 1000Apk direct plus a wide range of external sensors</td>
</tr>
<tr>
<td>Versatile interfaces</td>
<td>RS232, USB, LAN, GPIB as standard (PPA5500) plus direct torque and speed</td>
</tr>
<tr>
<td>Range of PC software options</td>
<td>Remote control, monitoring and recording of real time data, tables and graphs</td>
</tr>
<tr>
<td>PWM Motor Drive Measurements</td>
<td>Highest performance Analyzer on the market for PWM Motor Drive Evaluation</td>
</tr>
<tr>
<td>External Voltage BNC Connector</td>
<td>Unique External BNC connector with high sensitivity to interface with external High Voltage Probes</td>
</tr>
<tr>
<td>HF + TE Accuracy</td>
<td>Increased High Frequency and Low Power factor as standard, -HF and -TE certification optional</td>
</tr>

PPA5530 Precision Power Analyzer
FRONT VIEW

① POWER BUTTON
② FRONT USB PORT
USB memory port allows data or screenshots to be saved directly to a USB pen drive
③ DISPLAY SCREEN
White LED backlight colour TFT display with high contrast and wide viewing angle
④ SCREEN DISPLAY OPTIONS
Zoom, Real time, Table and Graph options
⑤ MEASUREMENT FUNCTION SELECTION BUTTONS
- POWER ANALYZER
- POWER INTEGRATOR
- HARMONIC ANALYZER
- TRUE RMS VOLTMETER and AMMETER
- IMPEDANCE METER
- OSCILLOSCOPE

⑥ MEASUREMENT SETTINGS BUTTONS
Acquisition settings - Sets wiring configuration,
Smoothing and data logging
Coupling - Set coupling to AC, DC or AC+DC, also set bandwidth
Range - Internal or external attenuator, autoranging settings, scale factors
Application mode - PWM, ballast, inrush current, power transformer, standby power,
IEC61000 (PPA5500)
Plus direct configuration of - Alarm, Auxiliary, Remote, System and Program functions

⑦ MENU SELECTION AND CURSOR CONTROL

⑧ START, STOP, ZERO AND TRIGGER
Trigger button refreshes measurement, Zero resets datalog or allows an offset trim
Start and Stop buttons provide manual control of a measurement period
PHASE INPUTS
Direct voltage Input: 3kVpk (1kVrms) in 9 ranges*
Direct current Input: 300Apk (30Arms) Standard Model, 30Apk (10Arms) Low Current Model, 1000Apk (50Arms) High Current Model
External voltage and current sensor inputs to 3Vpk in 9 ranges* - BNC Connector

SYNC CONNECTOR
All PPA models can offer up to 12 phase analysis using the PPALoG PC program
Additionally two PPA45/5530’s can be connected via the extension port and sync BNC connector to form a 6 phase analyzer when a PC is not available

EXTERNAL SENSOR INPUTS
+/-10V or pulsed input from torque and speed sensors provides direct measurement of mechanical power + analogue output

PC INTERFACE CONNECTIONS
Standard interfaces RS232 + USB + LAN + GPIB (Standard on PPA5500, GPIB optional on PPA4500)

LOW NOISE COOLING FANS
Air bearing low noise fans are utilized to ensure minimum audible and electrical noise while maintaining a stable operating temperature for the high precision low inductance internal current shunts

*PPA4500 - 8 ranges
**FEATURES**

■ **High Speed Power Measurement - 2ms* Datalog Interval** 🟢 PPA5500 🟢 PPA4500

Measurements include all frequency components in power waveforms for example, fundamental, harmonics of the fundamental and the carrier of a PWM inverter output by maintaining 2.2Ms/s sampling at any drive frequency.

*PPA4500 10ms datalog interval

![High Speed Power Measurement](image)

- High sample rate at all times
- Inverter output waveform
- PWM carrier signal

Unique FPGA and DSP architecture permits full 2.2Ms/s sample rate at any fundamental frequency.

![High Sample Rate at All Times](image)

Fast sampling reliably captures fast switching waveforms.

![Inverter Output Waveform](image)

■ **2MHz Wideband Frequency Response** 🟢 PPA5500 🟢 PPA4500

With 2MHz bandwidth and exceptionally flat response, the PPA provides precision analysis of total power in applications such as lighting ballasts or PWM drives that involve a wide range of frequency components. Proprietary to N4L, a digital process called Expanded Nyquist Sampling ensures no alias components.

![2MHz Wideband Frequency Response](image)

■ **High Accuracy** 🟢 PPA5500 🟢 PPA4500

Unique voltage and current analogue card design ensures high accuracy for both power and harmonic analysis.

![High Accuracy](image)

**Class Leading Power Accuracy**

PPA5500-HF Power Accuracy: [0.03% + 0.03%/pf + (0.005% x kHz)/pf] Rdg + 0.03%VA Rng*

@ 220V (300V Range), 2A (3A Range), Power Factor 1

![Power Accuracy](image)
**Advantages of Dual PPA vs Single instrument**
- Twice the processing power as one unit
- Flexibility between different applications
- Units fully synchronized giving single point of control

**Measurement parameter examples**
- Input/Output power measurement
- Efficiency of the inverter
- Inverter output voltage harmonics
- Motor drive characteristics

**DFT Real Time No Gap Analysis**

Many power applications have fast changing asynchronous current pulses which are not suited to fixed data length FFT analysis. The PPA series combine a real time DFT (Discrete Fourier Transform) technique with variable window no gap analysis to ensure the optimum speed and accuracy at all times.

- Missing data compromises power accuracy
- Long term measurement integration achieves approximately correct average power
- Real Time No Gap analysis ensures correct power measurement
- Simultaneous fundamental and pulse frequency synchronization quickly obtains the correct power

**Up to 6 Phase Analysis**

Master/Slave mode enables two PPA45/5530's to be fully synchronized into a single 6 phase measurement system.

4 or more phase measurements provided via N4L PC software or master slave mode
**FUNCTIONS**

- **Input Torque and Speed Sensor**
  
  Direct measurement of torque and speed from dedicated inputs that are fully synchronized with the voltage and current channels permits true real time power conversion efficiency to be evaluated.

1. **TORQUE** Bipolar±10V / pulsed
2. **SPEED** Bipolar±10V / pulsed
3. **ANALOGUE** Analogue output of selected function ±10V

- **Built in Amplifier and Unique Shunt Resistor**

  The PPA series use a single shunt resistor unique to N4L that combines exceptional linearity and no need for relay switching which can cause measurement errors.

- **Utilising external shunt resistors**

- **Current Detection**
  
  Measured current exceeds capacity of internal shunt (such as EV motors)

- **Small battery powered equipment**

- **Current Detection**

- **Selected Shunt**

- **Selected Shunt**

- **Shunt output**

- **Shunt output**
Large 1GB (PPA5500 series) internal memory, data logging from 2ms intervals with synchronization to the fundamental frequency and no gap between measurements.

Datapoint storage up to 10M in the PPA5500 series.

Alternatively the data can be stored in an external USB pen drive or directly to PPALoG PC software.

Voltage, Current, Frequency and Power - Examples of graph mode.
MEASUREMENT MODES

Power Integrator (power consumption) Mode, RMS Meter Mode and Impedance Meter Mode

- Power Integrator mode
- RMS Voltmeter mode
- Impedance meter mode

Note
In addition to detailed measurements of the phase power parameters, you can check the balance of power between the phases and observe computed neutral current when 3 phase 4 wire connection is selected.

Harmonic Analyzer and Oscilloscope

- Harmonic analyzer (Bar graph)
- Harmonic analyzer summary page
- Harmonic analyzer table
- Oscilloscope - Voltage and Current display
- Three phase display of voltage or current
- Oscilloscope Cursors - Enable cursors and display Vrms, Vpk, Watts, Power Factor, Arms and Apk

Note
In Harmonic Analyzer Mode, the PPA4500 provides up to 100 Harmonics with real time, table or bar graph presentation. Measurements are in absolute magnitude and percentage of fundamental with harmonic phase also available. The PPA5500 extends the harmonic range to 417 for aerospace applications and also includes a DFT based interharmonic analysis mode for aircraft standards testing (TVF105).
**ACQUISITION SETTINGS**

- **Auto-Ranging, Range Up Only or Manual**

  Range modes are selectable
  ① Auto-Ranging: Performs automatic switching of voltage and current ranges up and down depending on the level of the measured value with all inputs linked or ranged independently to ensure optimum accuracy.
  ② Range up only: Performs automatic ranging when the input is 120% of range, ranging up only.
  ③ Manual: No automatic ranging, user specifies the range in which to operate.

  (used when input voltages and currents are known) or during inrush current testing.

- **Independently Set Input Coupling**

  Independently set input coupling so different methods of sensing can be implemented. Such as a CT on phase 1 and shunt sensing on phases 2 + 3.

- **Wiring Settings**

  Various wiring arrangement settings to satisfy a complete range of setups found in power analysis.
ACQUISITION SETTINGS

■ Bandwidth Settings  PPA5500  PPA4500
DC (DC-5Hz)  DC measurements up to 5Hz
Low (DC-200kHz)  Basic power (50/60Hz) including harmonics of the fundamental while rejecting high frequency noise
Wide (DC-2MHz)  Wideband applications such as PWM inverter drives including all power components for true total power

Example of independent wiring configuration showing 3 phase individual coupling settings

Note
The PPA45/5500 series includes a programmable digital filter that allows users to set a preferred bandwidth

■ Display Settings, Smoothing Response and Frequency Reference  PPA5500  PPA4500
① Display update rate
Various settings for the display update rate (2ms ~ 100s) which also increases the smoothing when used together with the smoothing option. A 'window' option permits direct control of the measurement window size (Note: Minimum window size for PPA4500 - 10ms)

② Smoothing settings
Working in conjunction with the speed setting, a smoothing filter can then be applied to the measurements. Normal and slow options are available which apply an increasing time constant to the output of the measurement window

Example of setting the window, eg (50Hz set to 20ms)

・ Display update speed settings
・ Setting the filter (normal/slow)

■ Frequency Reference  PPA5500  PPA4500
When making a precision measurement of ac power, correct synchronization with the fundamental frequency is essential. The PPA series provides a solution to frequency synchronization in a wide range of applications including Standby Power, Variable Speed Drives, Electronic Ballasts and DC to AC Inverters with the option to select voltage, current, speed or ac line input as the frequency reference. The PPA45/5500 series also provide fully independent frequency detection on all phase inputs

Example of independent wiring configuration showing 3 phase individual coupling settings

The PPA45/5500 series includes a programmable digital filter that allows users to set a preferred bandwidth

Frequency Reference

1:5 cycle (10Hz standby current period)  Power measurements synchronized to low duty cycle current pulses of a power supply in standby mode

1:5 duty cycle standby power measurement cycle

1:50 low duty cycle (1Hz) power measurement
APPLICATIONS

■ Application Modes [PPA5500] [PPA4500]
In addition to the usual power measurements, various modes are pre-programmed into the instrument including "PWM motor drive", "ballast lighting system", "inrush current", "power transformer", "Harmonics and Flicker*", "TVF105*" and "standby power"

■ Inductance Loss Analysis [PPA5500] [PPA4500]
An example of analysis of dynamic inductance losses
**APPLICATIONS**

**PWM Motor Drive Evaluation**

The PPA5500 is the perfect solution for Inverter Drive evaluation and analysis. Utilising proprietary digital filtering algorithms, the N4L power analyzer range offers unrivalled performance. In high current applications the PPA5500 can be used in conjunction with external current sensors such as the LEM IT-400-S - a 150kHz to 500kHz galvanically isolated current transformer. Inverter efficiency is available via either 3 Phase 2 Wattmeter method + CH3 (utilising CH3 for the DC Bus measurement). Alternatively a second single phase PPA can be connected to the DC Bus and the two analyzers are configured in a Master Slave arrangement, all data is available via N4L Software.

**High Speed Analysis**

The PPA5500 features the fastest signal processing on the market, this enables high speed tracking of changing inverter drive frequencies and power parameters during ramp up and ramp down conditions, for example in electric vehicle applications. N4L's free to download software package (PPALoG) offers datalog intervals down to 5ms, providing fast, no-gap real-time data direct to software.
APPLICATIONS

■ Standby Power (IEC62301 Ed 2.0) [PPA5500 PPA4500]
The PPA4520 and PPA5520 units offer unrivalled dynamic range which enables the user to comply with IEC62301 and Energy Star testing standards. Utilising “Standby Power Mode” the PPA employs proprietary standby power signal processing algorithms to provide accurate no gap analysis of high crest factor (CF) signals, importantly the entire N4L power analyzer range benefit from a guaranteed accuracy specification up to a crest factor of 20.

■ Guaranteed Accuracy up to Crest Factor 20 [PPA5500 PPA4500]
As stated in IEC62301, typical standby power current waveform crest factors can exceed values of 10. In such cases it is important for the Power Analyzer to guarantee accuracy at crest factors expected of the application under test.

Newton4th are the only Power Analyzer Manufacturer in the world* to provide ISO17025 calibration certificates on all new Power Anlayzers as standard. Our ISO17025 Schedule of Accreditation includes Voltage, Current, Phase, Power, Harmonics and Flicker. With traceable certification of power accuracy down to 0.5W, N4L offer the ideal measurement solution for certified standby power measurement.

■ LED Driver Efficiency [PPA5500 PPA4500]
The PPA4520 and PPA5520 offer an ideal solution for LED driver efficiency measurements, dimming techniques such as reverse phase control are easily analyzed by the N4L Power Analyzers.

Efficiency can be viewed either directly on the PPA display using the "Phase/Next Phase" efficiency option or calculated in PPALoG software.

*According to N4L research August 2019
**Power Transformer Loss Testing**

Both the PPA4500 and PPA5500 series Power Analyzers incorporate a unique analogue input design and proprietary digital signal processing techniques that exhibit a market leading standard phase accuracy of 0.005°. This inherent phase accuracy is optimised further within the new PPA5500-Transformer Edition to provide an ideal transformer core loss testing solution in accordance with the IEC60076-8 standard. See our separate PPA5500-TE brochure for full specification details including UKAS ISO17025 accredited certification and extended calibration interval.

**Aircraft Avionics Industry - 417 Harmonics + Interharmonics**

The PPA5500, featuring high speed FPGA and DSP processors is able to compute up to 417 Harmonics and also meet interharmonic measurement requirements of ABD0100.1.8. The Harmonic Analyzer mode and special TTVF105 Interharmonic mode in the PPA5500 offer the Avionics Engineer an accurate, simple to use solution.

**APPLICATIONS**

- **AC Source**

  - Example ABD0100.1.8 Interharmonic Results, up to 150kHz (Sample Waveform analyzed for illustration)

  Note: PPA4500 up to 100 Harmonics
**Solar Inverter Performance Analysis**

The PPA5500 and PPA4500 provide a highly accurate solar inverter analysis and evaluation solution, featuring independent frequency detection. N4L Power Analyzers exhibit the ability to synchronize to the 50/60Hz output signal along with the DC input signal from the solar array. Both efficiency of the inverter, quality of the AC output and many other performance parameters can be recorded.

**Inrush Current**

Accurate inrush current measurements rely upon two factors aside from fundamental measurement accuracy, these are gapless measurement and a high sampling rate:

1. **Gapless Measurement** - Inrush waveforms by their nature are transient; gapless measurement is vitally important in order to ensure that inrush waveform data is not missed.

2. **High Sampling Rate** - When working with mains frequencies, many power analyzers have low sample rates due to the computation of measured values from a data block of finite size. The PPA4500 and PPA5500 utilize a proprietary real time signal processing technique that maintains full 2.2Ms/s sample rate irrespective of the measured load frequency, ensuring that high frequency events are captured without aliasing.
Newton4th are an accredited UKAS Calibration laboratory, all PPA4500 and PPA5500 Power Analyzers are supplied with an ISO17025 UKAS Calibration Certificate as standard. Calibration of N4L Power Analyzers is an integral and important part of our service to our clients, we offer quick turnaround times at a competitive price. Re-Calibration is also available at our international offices and various distributors throughout the world.

N4L's schedule of accreditation to ISO17025 is wide ranging and an overview of the schedule is detailed below, for more specific information, please see the UKAS website to view the full accreditation schedule.

Due to the specialist nature of Power Measurement Instrumentation Calibration, N4L utilise both commercially available calibration equipment (such as the Fluke 6105A for UKAS Certification) along with N4L bespoke designed signal generation equipment in order to calibrate our instruments over the full frequency range (up to 2MHz). Calibration over the full frequency range is uncommon given that such signal generation equipment is not commercially available. When supplied with an N4L analyzer, all customers will receive a calibration certificate covering the complete frequency range.

* UKAS Calibration is available from N4L UK HQ only, details for calibration performed at other locations is subject to local accreditation, please contact your local office for more details.

** 1MHz for 50A versions
Auto Peak Ranging Ensures Complete Waveform Analysis

It is often overlooked that for an instrument to correctly calculate power parameters, the entire waveform must be digitised for analysis. The Peak Ranging system employed by all N4L Power Analyzers ensures that the entire waveform is digitised and the correct power parameters are calculated.

Example RMS Ranging system, commonly used in older instrument designs

Modern Peak Ranging System, implemented on all N4L Power Analyzers

Waveform within red hashed area is clipped by an RMS ranging system and fixed crest factor setting

Peak Ranging system auto-detects the peak of the input signal and selects the ideal range

Note

An RMS Ranging system requires the user to have prior knowledge of the crest factor which in many applications is not practical, either because the user cannot reasonably be expected to know this value before a measurement, or because the crest factor is changing during a measurement period. The ideal ranging system is therefore based upon peak detection which does not require the user to be concerned with a crest factor setting. While many RMS ranging systems are only guaranteed to support a Crest Factor of 6, all N4L Power Analyzers guarantee to auto-range with any crest factor and maintain full accuracy with a CF of at least 20. While waveforms with a true CF above 20 are very unusual, ‘auto range up’ or ‘manual’ ranging combined with a market leading range sensitivity enables the PPA to achieve a dynamic range equal to a CF >300.
PC SOFTWARE

PPA Software

PPA5500  PPA4500

Analysis carried out by the instrument can easily be transferred to a PC via USB, RS232 or LAN

PPALog

Exceptional flexibility and ease of use with all the functions included in the original PPAcomm program plus multiple instrument control for 4-12 phase applications and data export to Text file, Excel, Bitmap or Clipboard.

Data Export Options

- Measurement parameters are chosen by the user from tick box options.
- Real time results can be displayed as latest value, table or graph.
- Datalogging results are then saved in the selected format.

PPA Standby Power

Full compliance testing to IEC62301. Meets or exceeds the requirements and methodology of U.S. EPA (Energy Star), U.S. DOE, California Energy Commission (CEC), among others.

Standby power test screen with real time update of IEC62301 criteria.
PC CONTROL AND DATA ACQUISITION

■ Fully Compliant IEC61000-3-2/3-3 Harmonics and Flicker Testing

The PPA55xx series Power Analyzers provide fully compliant ISO17025 certified Harmonics and Flicker testing, Newtons4th provide fully integrated software featuring real time and graphical user interfaces as well as excel and pdf exporting functionality.

Flicker tests are automatically evaluated against the IEC/BSEN or JIS limits and a pdf/excel report is generated indicated PASS/FAIL.

Both graphical and real time displays are available when testing to IEC61000-3-2/3/11/12. The graphs are colour coded to assist the test engineer.

More information is available in a separate IEC61000 Harmonics and Flicker brochure. Dedicated models called the PPA5511 and PPA5531 include low impedance shunts (see ** on page 20) and adjusted filter response for full compliance testing.

■ Connection Interface

RS232 (standard), USB (standard), LAN (standard on PPA5500), GPIB (standard on PPA5500)

■ Data Logging

Utilizing sophisticated frequency detection techniques, synchronization with the fundamental AC waveform is automatically achieved. Datalog intervals can be set from 2ms with measurements saved to a PC or internal memory.
SPECIFICATION

PPA4500

PPA5500

Frequency Range
DC, 10mHz ~ 2MHz - PPA4500-LC (10Arms), PPA4500-Std (30Arms)
DC, 10mHz ~ 1MHz - PPA5500-LC (10Arms), PPA5500-Std (30Arms)

Voltage Input
Internal
1Vpk ~ 3000Vpk (1000Vrms) in 8 ranges
(240Vrms within 300Vpk range, using 20% overrange)
Accuracy
0.03% Rdg + 0.04% Rng + (0.004% x kHz Rdg) + 5mV
Impedance
3Mohm in parallel with SpF - Common mode capacitance to chassis 90pF

External
1mVpk ~ 3Vpk in 9 ranges [BNC connector 3Vpk max input]
300mVpk ~ 3Vpk in 9 ranges [BNC connector 3Vpk max input]
Accuracy
0.03% Rdg + 0.04% Rng + (0.004% x kHz Rdg) + 3V
Impedance
1Mohm in parallel with 40pF - Common mode capacitance to chassis 90pF

Current Input
Internal
10Arms Low Current (PPA5500-LC)
4mm safety connectors
Ranges 10mApk ~ 30Apk (10Arms) in 8 ranges
Accuracy 0.03% Rdg + 0.04% Rng + (0.004% x kHz Rdg) + 30µA

30Arms Current (PPA5500-Std)
4mm safety connectors
Ranges 100mApk ~ 300Apk (30Arms) in 8 ranges
Accuracy 0.03% Rdg + 0.04% Rng + (0.004% x kHz Rdg) + 300µA

50Arms High Current (PPA5500-HC)
Ranges 300mApk ~ 1000Apk (50Arms) in 8 ranges
Accuracy 0.03% Rdg + 0.04% Rng + (0.004% x kHz Rdg) + 900µA

External input (External shunt current sensor)
BNC Connector (Max input 3Vpk)
Ranges 1mVpk ~ 3Vpk in 8 ranges
Accuracy 0.03% Rdg + 0.04% Rng + (0.004% x kHz Rdg) + 3V

Phase Accuracy
0.005°deg ± 0.01deg ± kHz [PPA45/5500-LC (10Arms), PPA45/5500 (30Arms)]
0.01deg ± 0.02deg ± kHz [PPA45/5500-LC (10Arms), PPA45/5500-Std (30Arms)]

Power Accuracy
10mHz-2MHz
LC/Std [0.04%+0.05%/pf+(0.01%+0.05%/pf)/pf Rdg] + 0.04% VA Rng
[0.03%+0.05%/pf+(0.005%+kHz)/pf]/pf Rdg] + 0.03% VA Rng

HC [0.04%+0.05%/pf+(0.01%+0.05%/pf)/pf Rdg] + 0.06% VA Rng
[0.03%+0.05%/pf+(0.01%+kHz)/pf]/pf Rdg] + 0.03% VA Rng

40-850Hz
[0.03%+0.04%/pf+(0.01%+kHz)/pf Rdg] + 0.03% VA Rng
[0.02%+0.03%/pf+(0.005%+kHz)/pf]/pf Rdg] + 0.01% VA Rng

1MHz-4.5kHz Low PF
See PPA5500-TE Brochure

General
Crest Factor 20 (Voltage and Current)
Sample Rate 2.2Ms/s on all channels, No-Gap
IEC Modes IEC62301 Standby Power
Application Modes PWM Motor Drive, Ballast, Inrush, Power Transformer, Standby Power
Fluctuating Harmonics, Flicker Meter, TVF105 Interharmonics
CMRR - Common Mode Rejection Ratio
250V @ 50Hz ≥ 1mA (150dB)
100V @ 100kHz ≥ 3mA (130dB)

Measurement Parameters
W, VA, Var, pf, V & A - rms, rectified mean, AC, DC, Peak, Surge, Crest Factor, Form Factor, Star to Delta Voltage, +ve Pk, -ve Pk
Frequency (Hz), Phase (deg), Fundamentals, Impedance
Harmonics, THD, TIE, THF, TRD, TDD
Integrated Values, Datalog, Sum and Neutral values

DataLog - Up to 4 user selectable measurement functions (30 with optional PC software)

DataLog Window No-Gap analysis, Minimum window 10ms
No-Gap analysis, Minimum window 2ms

Memory 16,000 records
10M records into flash RAM (Non-Volatile)

Communication Ports
RS232
No-Gap analysis
No-Gap analysis, Minimum window 2ms
LAN
(Fitted as standard) 10/100 Base-T Ethernet auto sensing
(GPPB G) IEEE488.2 Compatible
USB
USB 2.0 and 1.1 compatible

Analogue O/P
Bipolar ±10V (BNC)

Speed & Torque I/P
BNC Bipolar±10V or Pulse count 1Hz to 1MHz 0.01% Rdg

Sync 4 ~ 6 Phase measurement (Master/Slave)
4 ~ 6 Phase (Master/Slave) + Auxiliary

Standard Accessories
Leads Power, RS232, USB
Connection Cables 36A 1.5m long 4mm stackable terminals: 1x red, 1x yellow and 2x black per phase (1x red, 1x black with HC version)
CD-ROM ComView2 (RS232/USB/LAN), Command line, Script based communication software
Documents User manual, Communications manual, Calibration certificate, Quick start guide

Mechanical/Environmental
Input Impedance Voltage Attenuator 3MΩ || SpF
External Inputs 1MΩ || 40pF
Common mode capacitance to chassis 90pF

Display 320 x 240 dot full colour TFT, White LED Backlight
Dimensions 130H x 400W x 315D mm excluding feet
Weight 5.4Kg (Phase), 6Kg (3 Phase)

Safety Isolation 1000Vrms or DC (CATIII), 600Vrms or DC (CATII)
Power supply 90 ~ 265Vrms, 50 ~ 60Hz, 40VA max

Operating Conditions 23°C ± 5°C Ambient Temperature (or air intake temperature when rack mounted), 20-90% Non-Condensing Relative Humidity. Temperature coefficient ±0.01% per °C of reading at 5-18°C and 28-40°C

*DC Specification available separately
### PPA500/1500 MODELS

### OPTIONAL CALIBRATION

**IEC61000**

- Harmonics and Flicker certification to IEC61000 standards

**System Calibration**

- Combined PPA + External Current Sensor system certification

**IEC - Transformer Edition**

- Certified compliance to IEC61000 specifications

- Certified compliance to PPA High Frequency specifications

### PC SOFTWARE - FREE DOWNLOAD

**PPAsoft**

- PC control and data acquisition of 1 ~ 12 phases with selectable Real Time data, Graphing, Datalog and versatile export options

**PPAcomms**

- Basic PC Control, Data storage, Print features

**PPA Standby Power**

- Standby power measurements and reporting to IEC62301

**PPAsoft PC software**

- LabView based software, PC Control, Data storage and Print

**IECSoft**

- IEC61000 Testing Software

The N4L product range also includes Frequency Response and Impedance Analyzers, Selective Level Meters and Laboratory Power Amplifiers.

### Applications
- Power supply phase margin and gain margin (FRA)
- Inductance, Capacitance and Resistance (LCR)
- Analysis of mechanical vibration (HARM)
- Phase Angle Voltmeter (PAV)

#### PSM17xx
- **PSM3750**
  - 10µHz ~ 50MHz
- **PSM1750**
  - 10µHz ~ 35MHz

### Newtons4th
Newton4th Ltd (abbreviated to N4L) was established in 1997 to design, manufacture and support innovative electronic equipment to a world-wide market, specialising in sophisticated test equipment particularly related to phase measurement. The company was founded on the principle of using the latest technology and sophisticated analysis techniques in order to provide our customers with accurate, easy to use instruments at a lower price than has been traditionally associated with these types of measurements.

### Specifications

#### Basic Accuracy
- **V, A rdg error**: 0.05% 0.05% 0.05% 0.03% 0.01%
- **Power rdg error**: 0.10% 0.10% 0.06% 0.04% 0.02%

#### Phase Options
- **Internal**: 1 ~ 3 1 ~ 3 1 ~ 6 1 ~ 3 1 ~ 3
- **Master/Slave operation**: — 4 ~ 6 4 ~ 6

#### Bandwidth
- **20 & 30A Shunt**: DC ~ 50kHz
- **10 & 30A Shunt**: —
- **5A Shunt**: DC ~ 1MHz

#### Voltage Input
- **Max input voltage**: 2500Vpk

#### No. of ranges
- **8** 8 **10** 8 9

#### Direct Current Input
- **10Arms model**: —
- **20Arms model**: O
- **30Arms model**: O O
- **50Arms model**: O O

#### Bandwidth
- **10 & 30A Shunt**: DC ~ 1MHz
- **5A Shunt**: DC ~ 1MHz

#### Voltage Input
- **Max input voltage**: 3000Vpk

#### No. of ranges
- **8** 8 **10** 8 9

#### Features
- **Scope and Graph Modes**: —
- **USB Memory port**: O
- **GPIB Port**: O
- **RS232 Port**: O
- **LAN Port**: O
- **Real time clock**: —
- **Torque and Speed**: —
- **IEC61000 Mode**: —
- **PWM Motor Drive Mode**: —
- **Oscilloscope**: —
- **Transformer Mode**: —
- **PWM Filter Options**: TE version

#### Dimensions - Excl. Feet
- **H x W x D (mm)**:
  - 92 x 215 x 312
  - 87.5H x 400W x 347D mm
  - 130 x 400 x 315
- **Weight**: 3.3 - 4kg
